Elegans

Carlton Professional equipment is renowned for its high quality, durability and exceptional value. Used by Spas and Beauty Therapists and Colleges for many years it offers service that you have the right to expect.

Elegans Health & Beauty Pty Ltd is a wholly Australian owned company that has been providing quality equipment to the beauty industry for more than 70 years.

Elegans is the Australian distributor for Carlton Professional.

We take great pride in our involvement with the Carlton Group who have been providing quality equipment to Local Authorities, Colleges of Further Education, Beauty Schools and Beauty Salons & Spa's for more than 60 years.

We also pride ourselves on the service we deliver to our clients remembering that they always have a choice, so we look forward to assisting you with your professional requirements.

The Carlton products detailed in this catalogue are a small selection of the complete Carlton Professional range that is available in Australia. The full range of Carlton Professional products that are available can be viewed at: www.elegans.com.au/carlton

Considerable care has been taken to ensure an accurate description in this brochure, but we reserve the right to change the specification of any item without prior notice. Please also note that sizes and colours may vary. For more information, please visit our website www.elegans.com.au or contact our experienced staff who will be delighted to help you.

ChromaPeel

This combination unit brings you the ultimate in new innovative treatments. Diamond Dermabrasion and Colour Therapy. It also gives the functions of sponge and brush cleansing. Diamond peeling is a fantastic anti-ageing treatment and leaves the skin feeling soft and silky and looking radiant. No mess, no fuss, the discs glide effortlessly over the skin performing a wonderful peel. No vacuum as there are no crystals to remove from the skin. Four colours: Red, Blue Green and Yellow set at specific wavelengths along with four pulsed modes at different frequencies gives you this latest therapy treatment from a brand you can trust.

CC 2315

- 1 40mm dia. Soft goat hair brush
- 1 40mm dia. Natural sponge
- 2 20mm dia. Diamond heads # 80
- 2 15mm dia. Diamond heads # 120
- 1 Colour therapy unit
- 1 Set of products

SIZE: 280 x 205 x 140mm
WEIGHT: 3Kg

ChromaVisage

With this unit you have all the benefits of Microcurrent for facial contour lifting and Colour Therapy, one of the latest treatments on the market. Microcurrent re-programmes the muscle fibres, reducing fine lines and wrinkles of the face and neck. With desincrustation and iontophoresis facilities too you have the ultimate in facial care. Colour Therapy is the latest trend for facial treatments. With four colours; Red, Blue, Green and Yellow set at specific wavelengths and four pulsed modes with different frequencies, every option is available to perform the perfect treatment.

Body electrodes sold separately.

CC 2320

- 2 Cleanse electrodes
- 2 Lifting probe electrodes
- 2 Metal tips
- 1 Packet disposable sponges
- 1 Set of connecting cables
- 1 Set of products
- 1 Video CD (Microcurrent only)
- 1 Colour Therapy Unit
- 1 Set of products

SIZE: 280 x 205 x 140mm
WEIGHT: 2.0kg

Derma Visage

CC 3040

The Derma Visage can offer Crystal and Diamond Microdermabrasion as well as Colour Therapy all in one compact machine (the CC3050).

Cutting edge technology for a results driven treatment.

This unit (CC3040) provides Crystal Microdermabrasion only.

The Diamond Peeling and Colour Therapy units can be added either individually, or together, at any subsequent time.

What's great for you as a Therapist or a College, is the choice:

- you can either have the machine complete with the three functions (Crystal and Diamond microdermabrasion with Colour Therapy);
- two functions (Crystal Microdermabrasion with choice of Diamond Peel or Colour Therapy); or
- just Crystal MDA and add the other options later as needed.

Benefits:

Has the option of making it a 3 in 1 machine.

Cutting edge technology for a results driven treatment.

DermaVisage allows you to choose the preferred "type" of Microdermabrasion.

Features:

Supplied with the Crystal only unit:

- Crystals
- Crystal Tips
- Set of Products (3 units) Post Peel Lotion, Pre Peel Lotion, Enzymatic Paste

Size: (L x W x H) 315 x 385 x 231mm

Derma Visage

CC 3050

The ultimate new anti - ageing machine DermaVisage.

Incorporating both Crystal and Diamond peeling in one unit is a first and also with Chromatherapy this multi function machine provides all the latest results driven treatments in one very neat package.

Diamond is the hardest natural substance in the world and Aluminium Oxide Crystals are the second, so, being able to offer both now, and from one machine, you can offer either treatment to suit all your clients' needs.

Used in combination with either of the Microdermabrasion treatments or separately, the Colour Therapy treatment stimulates the skin's cells to facilitate change. The inclusion of four colours (red, green, blue, and yellow) using LED lights set at varying wavelengths offers a wide range of benefits. Four pulsed modes are also included which allow the colour used to penetrate the skin at different levels.

As UK manufacturers with many years of experience, Carlton Professional are specialists in Microdermabrasion machines...You know you can rely and trust the Carlton Brand!

The machine can be purchased just as a Crystal Microdermabrasion unit only, (CC3040) then the Diamond Peeling and/or the Chromatherapy can be purchased at a later date. Ideal for the college environment.

Ultra Visage

The Ultra Visage™ is a low frequency, microcurrent mains operated electronic unit. Its specially designed programme uses pre-set, timed variable wave forms to complete the treatment.

Ultra Visage™ offers facial and body contour lifting by re-programming the muscle fibres, reducing and smoothing the fine lines and wrinkles on the face and neck. Sagging breasts and upper arms will improve immensely, along with skin tone and texture. The unit is more than just a lifting treatment. To enhance the treatment and offer your client a complete facial, the Ultra Visage™ has combined within the unit desincrustation and iontophoresis with a collagen/elastin ampoule. The ultimate facial care.

MICRO-CURRENT CC 2000

- 2 Cleanse electrodes
- 2 Lifting probe electrodes
- 2 Metal lifting tips
- 2 Body electrodes
- 1 Set of connecting cables
- 1 Packet disposable sponges
- 1 Set of products
- 1 Video CD

SIZE: 280 x 205 x 140mm
WEIGHT: 2.0kg

High Frequency Galvanic

Ultraderm, the very popular combination of high frequency and galvanic treatment, is contained in one neat and functional unit that is supplied complete with full accessories for facial therapy treatment. The Ultraderm has totally independent controls for each of its functions and is fitted with an LCD display to monitor the galvanic current, together with a polarity changeover switch.

The Ultraderm is fitted with a quartz timer to assist the therapist in planning her facial treatment programme.

ULTRADERM CC 2312

- 4 Glass high frequency electrodes
- 1 Cleanse electrode
- 1 Indifferent electrode with sponge cover
- 2 Roller electrodes
- 1 Small twin ball electrode
- 1 Packet of disposable sponges
- 1 Sample of products
- 1 Set of connecting cables

SIZE: 280 x 205 x 140mm
WEIGHT: 4.1kg

Faradic

A totally transistorised passive muscle exerciser with 10 outlets feeding 20 electrode pads. Each outlet has an individual intensity control. The CARLTON Faradic has an advanced specification allowing the operator to not only select the duration of each contraction and relaxation, the frequency and the intensity but also to vary the pulse width giving far greater performance and a higher level of client comfort. The operator can select from four pulse sequences giving either positive or mixed contractions on a regular or intermittent basis. Being fitted with a digital countdown timer also allows the therapist to see easily the duration of treatment time left.

To ensure complete safety and comfort the CARLTON Faradic has a reset button which prevents its use unless all controls have first been set to zero. This reset circuit is also connected to a remote control client alarm to switch off the apparatus and sound a buzzer.

CC 2310

- 2 25mm Facial electrodes and holder
- 16 100mm electrode pads
- 4 75mm electrode pads
- 10 1700mm connecting leads
- 14 Elasticated body straps
- 1 Tape measure
- 1 Client alarm switch

SIZE: 380 x 255 x 175mm
WEIGHT: 5.1kg

Body Galvanic

The CARLTON Professional Body Galvanic is a comprehensive multi-outlet unit for all professional treatments. It has four independent outlets each with a digital readout monitor.

The unit is supplied complete with 8 body electrode pads having specially manufactured triple sponge pouch covers to eliminate any risk of galvanic allergy. Also supplied with all connection leads and a set of elasticated body straps.

CC 2313

- 1 Set elasticated body straps
- 8 100mm electrode pads
- 4 1700mm connecting leads
- 8 120mm sponge pouches

SIZE: 280 x 205 x 140mm
WEIGHT: 1.8kg (Products not included)

High Frequency

An electronically generated high frequency current, controlled by an infinitely variable potentiometer, allowing the therapist to vary the output from gentle soothing to a highly stimulating current.

HF 11 (see also CC2311)

SIZE: 235 x 125 x 65mm
WEIGHT: 2.1kg

High Frequency Pulsing Vacuum

A professional electronic unit for the beauty salon supplied with five popular electrodes fitted into the specially constructed white powder-coated casing. The sophisticated CARLTON high frequency current changes up to 200,000 times per second and the circuitry intensifies the mains voltage up to 150,000 volts with only minimal amperage, giving tremendous benefit to the client.

The primary action of this current is thermal, or to produce heat. Because of its rapid oscillation there are no muscular contractions and the effects are either stimulating or soothing depending on the method of application.

The high frequency current has a marked germicidal action on the skin and aids the deeper penetration of products. The high frequency handle has been manufactured from a high insulation material designed to inhibit the transfer of current through to the therapist and, of course, to the client during indirect operation with the saturator electrode.

CC 2311 see High Frequency HF 11 on page 5

- 1 HF 910 Roller
- 1 HF 903 Large bulb
- 1 HF 911 Glass saturator
- 1 HF 905 Neck
- 1 HF 904 Small bulb

SIZE: 280 x 205 x 140mm WEIGHT: 2.0kg

Vacupulse is a complete, regulated, air system incorporating constant vacuum suction and an infinitely variable pulsating action. The specification of the powerful vacuum motor provides for either facial or body treatment in either mode. The power is varied through a precision needle valve with very fine control which is linked to an accurate vacuum gauge on the front of the unit. A changeover switch determines whether the unit produces a constant vacuum or a pulsating action. When 'Vacupulse' is selected both the frequency and the pulse width can be individually adjusted enabling the therapist to carry out a vast range of treatments. This unit has twin tubing for Vacupulse so that a pulsing massage can be performed through pairs of pneumo-lifting cups. This treatment is very beneficial to lined or wrinkled skin as it will activate the blood circulation and draw moisture to the surface of the skin.

VACUPULSE CC 2326

- 5 Facial ventouses
- 1 52mm dia. Glass body cup
- 1 40mm dia. Glass body cup
- 2 32mm dia. Pneumo-lifting cups
- 2 25mm dia. Pneumo-lifting cups
- 2 Lymph drainage Pneumo-cups
- 1 Atomiser spray bottle
- 1 Stand
- 1 Tubing set

SIZE: 380 x 255 x 175mm

WEIGHT: 5.2kg

Dermaabrasion

CC 3000 PEEL PROFESSIONAL

Controlled Microdermabrasion is a modern technique designed to improve the skin's regenerative capabilities and better still, control specific skin conditions.

The Carlton Peel Professional works using a "closed system". This means that crystals flow only when the handpiece is applied to the skin.

This ensures absolute safety when using the machine, especially when treating areas close to the eyes.

Carlton Peel Professional Microdermabrasion works using a controlled flow of ultra clean aluminium oxide crystals set in motion by vacuum created low pressure. The crystals are applied to the skin with a special handpiece which allows the controlled and gentle removal of the dead cells from the Stratum Corneum of the Epidermis. The same handpiece removes the used crystals and skin particles in a single process and deposits them in a separate container. Being absolutely inert there is no risk of crystal related side effects. The flow of crystals and the depth of peeling is perfectly controllable.

PEEL PROFESSIONAL PRODUCT LINE
A range of products designed to work with the Carlton Peel Professional Microdermabrasion machines. All you need to cover Basic, Regenerative Microdermabrasion, Acne and Scar Tissue treatments.

CC 3000

- 1 2 kg Crystals
- 5 Packs of hydro beads
- 2 Packets of treatment heads (20)
- 1 Set of basic treatment products (3)
- 1 Crystal brush
- 1 Video CD

SIZE: 330 x 420 x 230mm

WEIGHT: 14kg

Baby Peel Professional

CC 3010

- Regulated crystal flow
- Sealed crystal cartridges - no mess - no fuss - no contamination
- Suitable for salon/college or mobile use
- Easy to use

This baby version of the Peel Professional uses aluminium oxide crystals in disposable sealed crystal cartridges combined with vacuum created low pressure, in order to improve the skin's regenerative capabilities and better still control specific skin conditions. As the crystal cartridge is sealed there is no risk of contamination from the used crystals to the new crystals. Ideal for mobile use this lightweight machine can be combined with the Peel Professional product range in order to perform Basic, Regenerative Microdermabrasion, Acne and Scar Tissue treatments.

UltraPro Complex

CC 6000

GALVANIC / MICRO-CURRENT / HIGH FREQUENCY / VACUUM / VACUPULSE / BRUSHING

A complete Treatment System for the Professional salon/spa. The UltraPro Complex incorporates six specific functions providing the therapist with everything neatly to hand in one compact unit. It comprises of High Frequency, Galvanic, Microcurrent, Face/Body Vacuum, Vacupulse and Brushing.

This machine is a dream and very practical for the busy salon / spa where time is of the essence as all is at hand all the time, no swapping trolleys or machines....

It is supplied with a full set of accessories for each function totalling 30 in all.

- 2 Body electrodes
- 2 Lifting probe electrodes
- 2 Metal lifting tips
- 1 Packet disposable sponges
- 2 Cleanse electrodes
- 1 Small twin ball electrode
- 2 Roller electrodes
- 1 Indifferent electrode with sponge cover
- 4 Glass high frequency electrodes
- 1 Set of vacuum ventouses (5)
- 1 Set of vacuum body cups (2)
- 1 Pair of large round pneumocups
- 1 Pair of small round pneumocups
- 1 20mm dia. Natural sponge
- 1 40mm dia. Natural sponge
- 1 40mm dia. Soft goat hair brush
- 1 Set of connecting cables
- 1 Tubing set
- 1 Set of products
- 1 Video CD

SIZE: 535 X 305 X 200mm
WEIGHT: 12Kg

CC305Z Trolley and CC100ALF3 lamp available separately.

CC85 COLOUR THERAPY APPLICATOR (available separately) Four colours: Red, Blue, Green & Yellow. Four pulsed modes
