

Quality Australian Made Product

Thermogal Blend Epilator

Blend is the machine for the electrologist who wants multiple features combined with reliability and durability. Offering the high speed of thermolysis with the efficacy of electrolysis, Blend allows switching between modes or the simultaneous use of both. The dual meters show the current in use and its intensity.

Modes of operation

- * Conventional thermolysis only
- * Blend epilation
- * Conventional electrolysis only
- * Ionisation/disencrustation

Specifications

Width 276
Height 160
Depth 178

Colour White
Mains cord Approx 2 M
Power 240V 50Hz

Features

Dual metering
Multiple mode selection
Timer
Dual footswitches

Warranty

Two years, parts and labour, back to base

Accessories

Needles in a range of types and sizes
