

Quality Australian Made Product

Saunazone Elite Steamer

The Saunazone Elite Steamer produces a fine atomised vapour for moisturising and revitalising the skin. Every elite steamer comes with ozone as standard. The drip free steam will dilate the pores to facilitate deep cleansing. With the aroma therapy accessory, oils can be held within the pressure chamber above the water level for dispensing during steaming. The adjustable neck permits a wide variety of working positions. In standby mode, the Saunazone Elite is ready to steam immediately at the touch of a switch.
