

Diamond Peel

SM-8687

Skinmate Diamond Peel Microdermabrasion uses a diamond surface to gently clean and rejuvenate the skin surface. Loose derma is vacuumed away leaving a smooth skin surface. Diamond peel has three different grades of diamond applicator which can be matched to the skin type and condition, and is generally less abrasive than crystal microdermabrasion.

Skinmate Diamond Peel also comes with a spray attachment which allows the salon operator to apply moisturisers or other water soluble sprays before during or after the treatment.

Skinmate Diamond Peel comes with 3 different sized diamond heads in 3 grades of abrasive stored in an attractive timber case. The heads are easily removed for disinfecting and can be autoclaved. Adjustable vacuum and suction controls are mounted on the front of the machine along with a vacuum/pressure gauge. An easy clean filter is mounted on the back of the unit.

Skinmate Diamond Peel has a 12 month return to base warranty.

Dimensions: Width = 260mm, Depth = 330mm, Height = 150mm
